Education and Awards

East Carolina University | Greenville, NC — May 2028
Bachelor of Science in Engineering, Concentration in Civil & Environmental Engineering — GPA: 4.0
Minor in Community and Regional Planning, Minor in Mathematics, Minor in Composite Natural Science

Awards

Brinkley Lane Scholars, ECU Honors College — Mar 2024

This 4-year scholarship is the highest merit scholarship available at ECU and covers the cost of tuition, fees, room and board. Each year, only twenty students are accepted out of 1,000+ well-suited candidates.

Science, Mathematics, and Research for Transformation, US Department of Defense — Apr 2025

The DoD SMART Scholarship is a leading education-to-workforce development initiative focused on attracting and retaining top technical talent in critical and emerging technologies.

Additional: CSE3 Outstanding Student Researcher, Chancellor's Fellow, Chancellor's Student Leadership Academy, ECU Excels Scholar, Chancellor's List

Relevant Work Experience

ECU Center for Sustainable Energy and Environmental Engineering — Sep 2024 – *Present*
Undergraduate Research Assistant – Etheridge Lab, Greenville, NC
- Created and applied code in RStudio to seamlessly analyze data for consolidation and analysis.
- Utilized key geospatial analysis skills to categorize and identify land use over 5,000+ acres of watershed.
- Worked alongside community and federal partners to further mutual goals and apply research findings.

Naval Facilities Engineering Systems Command Southeast — May 2026 – July 2026
Environmental Engineering Intern, Water Compliance – Jacksonville, FL
- Assisted in engineering plan review for large scale military construction throughout the southeast.
- Developed scripts in Python to analyze $4 million in hazardous waste disposition costs.

Civil Design Concepts, P.A. — Jun 2025 – Aug 2025
Predevelopment Civil/Site Engineering Intern – Asheville, NC
- Balanced federal, state, and local regulation in the design of high-level site design and planning.
- Strengthened skills in site research for sites ranging in 10-300 acres. Key focuses were around constructability, local and state ordinance, utility locations, wetland impacts, and flood risk.
- Utilization of AutoCAD Civil3D and GIS software for the generation of 30+ individual site plans.

Civil Design Concepts, P.A. — Feb 2024 – Aug 2024
Civil/Site Engineering Intern – Asheville, NC
- Developed key drafting and site generation skills while still in high school.
- Administered site visits to ensure plans were followed and violations were addressed in an adequate manner.

Campus and Community Involvement

- American Society of Civil Engineers, ECU Chapter President — Feb 2024 – Present
- ECU Environmental Engineering Student Leadership Council — Nov 2024 – Present
- Tar River Community Science Festival Volunteer Manager — Sep – Nov 2024, 2025
